Wallet Activity: Apple Card Action Audit Log

September 2020

File name Apple Card Action Audit Log.csv

File description This file contains audit logs of each Face ID or Touch ID-initiated action the user takes on an Apple Card-registered device (e.g., scheduling payments and activating or disabling the card).

Why Apple keeps this information Apple retains this information in order to maintain a record that an action was authorized from a specific device.

Field Name	Details
Apple ID Number	Apple account identifying number
Secure Elements Id	Identifier for the secure element on the user's device
Date	When the user's Apple Card action occurred
Audit Data	Data elements associated with requested action used to generate a signature on the user's device (specific fields may change, depending on the user's Apple Card action)
